SUMMARY

Motivated HNDIT student with practical knowledge of software development and information technology. Skilled in Java, React.js, Spring Boot, MongoDB, MERN Stack, and REST APIs, with experience developing academic and personal projects. Familiar with full stack web development, database management, API integration, authentication, and software development practices. A quick learner with good problem-solving, teamwork, and communication skills. Seeking an IT internship opportunity to apply my technical knowledge, gain real-world industry experience, improve my professional skills, and contribute to the organization while continuously learning and growing as an IT professional.

PROFESSIONAL EXPERIENCE

Bank Trainee, Bank of Ceylon

School Lever

09/2023 – 03/2024
Colombo , Boc Head
Office, Sri Lanka

EDUCATION

Higher National Diploma in Information Technology (HNDIT)

Sri Lanka Institute of Advanced Technological Education - SLIATE

09/2024 – Present
Gampaha, Sri Lanka

Relevant Coursework: Software Engineering, Machine Learning, Software Quality Assurance Enterprise Architecture, Principles of user interface design, Fundamentals of programming, etc.

Certificate Course in CELV

National Apprentice and Industrial Training Authority - NAITA

2024
Moratuwa , Sri Lanka

Introduction to Basic Computer Course

Kalutara Zonal Computer Resource Center

01/2020 – 05/2020
Kaluthara , Sri Lanka

Human Resource Management Course

Open University Kalutara

10/2024
Kaluthara , Sri Lanka

GCE Advanced Level Examination

Buddhist Girls College

10/2022
Mount Lavinia
,Sri Lanka

GCE Ordinary Level Examination

Uggalboda Maha Vidyalaya - Kalutara

12/2019
Kaluthara , Sri Lanka

PROJECTS

Hospital Management System

Spring Boot

Developed a full-stack Hospital Management System using React.js, Spring Boot, and MongoDB to manage patients, doctors, appointments, and payments. Applied Object Oriented Programming (OOP) concepts such as encapsulation, inheritance, abstraction, and polymorphism to create reusable and maintainable backend components. Implemented REST APIs, JWT-based authentication, role-based access control, and CRUD operations to provide secure and efficient management of healthcare services. Tested APIs using Postman.

I-Computer E-Commerce System

MERN Stack

Developed a simple e-commerce website for an I-Computer shop using the MERN Stack. The system includes user registration and login, product browsing, and basic online shopping functionality. Implemented a responsive user interface and connected the frontend with backend APIs and MongoDB for data management.

SKILLS

Programming Languages	- Java , Java Script
Frontend Development	- React.js , Type Script , Tailwind CSS , CSS
Backend & API Development	- Spring Boot , REST API , Node js
Programming Concepts	- Object-Oriented Programming - OOP , Agile/Scrum
Testing & Development Tools:	- Postman
Tools & Version Control	- GitHub
Databases	- SQL , Mongo DB
Deployment & Hosting	- Vercel

SKYREK

2025

Online Course

I learned how to develop a complete full-stack web application using the MERN Stack. Technologies I Learned

-
- **MongoDB** – Database management
- **Express.js & Node.js** – Backend and REST APIs
- **React.js** – Frontend development and components
- **JavaScript** – Frontend and backend programming
- **Authentication** – User registration and login
- **CRUD Operations** – Managing application data
- **Git & GitHub** – Version control
- **Postman** – API testing
